

Please.....No cell phone use on passenger aircraft except for emergencies. We have to put up with long-winded and loud cell phone usage in restaurants, supermarkets, department stores and elsewhere now. They are also causing accidents in traffic. Most of these calls are just chit-chat without a real purpose anyway. Passengers on aircraft are in very tight and close quarters. The air is bad, the situation is tense. I would even support placing cell phones in hold baggage. Thanks.
